

## Product Highlight

Level is a company that produces ski and snowboarding gloves. Their ski mitts feature colorful, eye-catching designs that incorporate SuperFabric® MULTICOLOR. Shown here is an excellent example of a finished product using our SuperFabric® MULTICOLOR material.

# SuperFabric®

Unrivaled Performance. Unmatched Durability. Unlimited Possibilities.

## MULTICOLOR™

## Introduction

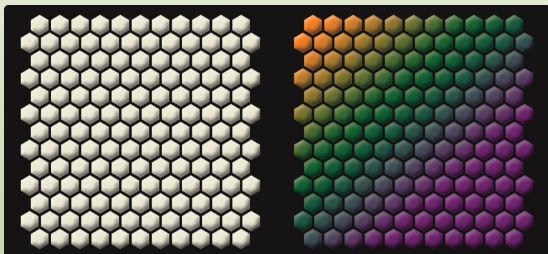

With SuperFabric® MULTICOLOR, a stunning variety of colors and patterns is possible. SuperFabric® MULTICOLOR is continuous color sublimated onto the guard plates, resulting in a vibrant product your customers will appreciate.

SuperFabric® MULTICOLOR offers designers a unique combination of performance and design. Bags, backpacks, luggage, footwear, outerwear, and seating are just few products that can utilize the benefits of this new SuperFabric® material.

## Technology

SuperFabric® MULTICOLOR involves a deeper penetration of the dye (color) than ink-jet printing. The color does not penetrate completely through the guard plates, but the result is a durable color finish.

Examples of SuperFabric® MULTICOLOR

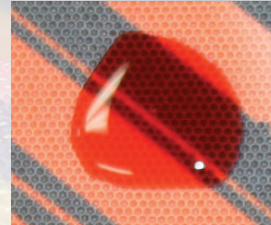

## Performance

### • DURABILITY

SuperFabric® MULTICOLOR provides the same great integral durability as regular SuperFabric® since the color is applied directly onto the hard guard plates.

### • STAIN RESISTANCE

SuperFabric® MULTICOLOR offers good levels of stain resistance against substances such as oil, mustard, ketchup, soda pop, dirt, and mud.

### • SCUFF RESISTANCE

SuperFabric® MULTICOLOR is not just a surface treatment. While it can be scraped, it does provide more scuff and scratch resistance than expected.

### • COLD WEATHER/UV PERFORMANCE

SuperFabric® MULTICOLOR can handle harsh conditions such as cold weather and temperature extremes, and is UV resistant.

## Applications

SuperFabric® MULTICOLOR is versatile enough to be used in a wide variety of finished goods, including:

- Handbags and Cosmetics Bags
- Backpacks and Luggage
- Apparel
- Gloves and Mittens
- Footwear
- Seating Surfaces

NOBULL Trainer with SuperFabric® MULTICOLOR
