

Antimicrobial SuperFabric®

SuperFabric® Plus Antimicrobial (**Am99™**) is a line of SuperFabric® that adds antimicrobial functionality. SuperFabric® materials are already known world-wide for their performance properties such as durability, stain resistance, breathability, quick drying, and more.

Am99™ pushes the boundaries by adding antimicrobial functionality while still maintaining the other inherent features of SuperFabric®. They have been tested by one of the leading laboratories (TUV-SUD) and found highly effective at killing microbes and viruses on its surface.

- | | | |
|--|----------|---------------------------|
| Kills Viruses and Bacteria | | Durable |
| Odor-Resistant | + | Stain Resistant |
| Mold & Mildew Resistant | | Quick Drying |
| Environmentally and Ecologically Friendly | | Abrasion Resistant |

AND more!!!

The antimicrobial agent used in **Am99™** kills and retards the growth of these types of microbes on its surface:

Am99™ is formulated with antimicrobial properties to protect the SuperFabric® itself from stains, odors, and damage caused by bacteria and other microbes. Antimicrobial protection is limited to the SuperFabric® material. Higher Dimension Materials makes no direct or implied claims to protecting users or providing other health benefits.

This revolutionary textile contains silver glass (EPA Registration Numbers 73148-1 through 73148-3 and 73148-5 through 73148-8) embedded into its guard plates, resulting in a durable treatment that does not wash off under normal laundering conditions, does not leach and is highly resistant to being abraded off.
