

SuperFabric®-Am99™

SuperFabric® adds a **NEW** member to its portfolio of product offerings with the addition of its SuperFabric®-Am99™.

SuperFabric® materials are already known world-wide for their performance properties such as durability, stain resistance, breathability, quick drying, and more. SuperFabric® attains this remarkable combination of properties by having an array of closely spaced, engineered guard plates that creates a **LOCALLY HARD, GLOBALLY FLEXIBLE** fabric.

NOW, *SuperFabric®-Am99™, pushes the boundaries by adding antimicrobial functionality while still maintaining the other inherent features.

**Microbial Resistant
Odor-Resistant
Mold & Mildew Resistant**

**Durable
Stain Resistant
Quick Drying**

AND more!!!

The antimicrobial agent used in Am99™ kills and retards the growth of these types of microbes on SuperFabric®

bacteria

fungi

mold

mildew

algae

* Note that SuperFabric®-Am99™ contains antimicrobial agents intended to protect the product itself, by inhibiting the growth of microbes that may affect this product. The antimicrobial properties protect this product against bacteria, viruses, germs, or other disease organisms on SuperFabric®-Am99™.

This revolutionary textile contains one or more of silver zeolite (EPA Registration Number 40810-18) embedded into its guard plates, and/or Silane Quaternary Ammonium Compounds agents (EPA Registration Number 83019-1, EPA Registration Number 83019-2, EPA Registration Number 83019-3, EPA Registration Number 83019-4) that are either incorporated into the guard plates or chemically bound to the substrate fabric, resulting in a durable treatment that does not wash off under normal laundering conditions, does not leach and is highly resistant to being abraded off.
